

# Payne Institute Fall Seminar Series

## Colorado Representative Chris Hansen, District 6, Denver

### State Politics and Policy

**1:00-2:30pm | October 31, 2019**

**Alderson Hall, 230**

Representative Hansen has been in the environmental and energy space for almost 20 years, working with renewable energy and electricity companies, as well as governments at every level to improve their operations. He has also had the privilege of teaching courses at the University of Colorado focused on these issues and get to educate the next generation of leaders in this space. The business and environmental policy insight he has gained from these experiences gives him a unique perspective on the many challenges that our state currently faces. He has come to see how we as a state can do better to give all of our kids equal opportunities, protect our environment, encourage businesses to start up and grow, and expand employment opportunities in Colorado, especially in the clean technology sector.
