

Payne Institute Spring Webinar Series presents

**Dr. Dolf Gielen**

Director, IRENA Innovation and Technology Center

## Deploying Renewables for Hard to Decarbonize Sectors

Getting to zero CO<sub>2</sub> emissions is challenging for energy intensive industry and parts of transportation. This lecture will discuss latest international initiatives, technology solutions and enabling frameworks that are currently under consideration.

As Director of the IRENA Innovation and Technology Centre (IITC) since 2011, Dolf Gielen oversees the Agency's work on advising member countries in the area of technology status and roadmaps, energy planning, cost and markets and innovation policy frameworks.

9:00am-10:00am (MT)
