

Payne Institute Spring Webinar Series presents

Nicole Hanson, ME and HE, Mines 2014
Sustainability Specialist, International Copper Association

Comparing Responsible Sourcing Approaches for Gold and Copper

Nicole Hanson graduated from Mines in 2014 in Mechanical Engineering with a Humanitarian Engineering minor and now works for the International Copper Association as a Sustainability Specialist. She will share her journey from mechanical engineering to sustainability, deep-dive into a comparison between the efforts to improve artisanal scale gold mining and a related project in the copper industry, and exchange ideas with participants on how their research and design projects fit into “life after Mines”.

5:30pm-6:30pm (MT)
Wednesday, April 15, 2020
