Payne Institute Fall Webinar Series presents

Laura Cozzi

Chief Energy Modeller, International Energy Agency (IEA)

World Energy Outlook 2020

The World Energy Outlook, the IEA’s flagship publication, provides a comprehensive view of how the global energy system could develop in the coming decades. This year’s exceptional circumstances require an exceptional approach. The World Energy Outlook 2020 is firmly focused on the next 10 years, exploring in detail the impacts of the Covid-19 pandemic on the energy sector, while mapping out the choices that would pave the way towards a sustainable recovery.

The strategic insights from the WEO-2020 are based on detailed modelling of different potential pathways out of the crisis, covering all regions, fuels and technologies and using the latest data on energy markets, policies and costs.

Laura Cozzi was appointed the Agency’s Chief Energy Modeller in 2018. As Chief Energy Modeller Ms. Cozzi oversees the Agency’s work on outlooks and forecasts and is in charge of overall consistency of modelling work and resulting messages. Ms. Cozzi is also Head of the Demand Outlook Division with responsibility of producing the annual World Energy Outlook, the IEA flagship publication. The Division produces medium to long term energy demand, efficiency, power generation, renewables and environmental analysis for the World Energy Outlook and other publications.
