Payne Institute Fall Webinar Series presents

Dr. Tim Boersma - Non-Resident Fellow at the Center on Global Energy Policy, Director, Sustainability & Strategy Advisory, ABN AMRO

The Possible Role of Natural Gas in Various Energy Transition Pathways

An introduction in the possible role of natural gas in various energy transition pathways (and the risks and uncertainties associated with it), and what role the financial sector may play to address some of those risks and uncertainties.

Dr. Tim Boersma is a non-resident Fellow at the Center on Global Energy Policy. In his full-time capacity he works at the Dutch bank ABN AMRO. Boersma has also been a Fellow and the Acting Director of the Energy Security and Climate Initiative at the Brookings Institution, and worked in the Dutch electricity sector.
